

**When: Every Wednesday, 3:05 pm - 4:20 pm**

**January 9<sup>th</sup> - May 22<sup>nd</sup>**

**Who: Grades 5-6, maximum of 16 students**

**Cost: \$400 (20 classes)**

***Fee includes a snack (often homemade) and all materials***

Come join the science exploration fun with long-time Mason Prep science teacher Cindy Renkas! Age-appropriate, fun activities include concepts related to color chromatography, cohesion and adhesion, density, diffusion and osmosis, chemiluminescence and how light travels through water versus air. Along the way, students' ideas and suggestions will help guide what activities we choose to do each week.

---

*A few testimonials from students and parents who participated in our Fall 2018 Science club:*

*“Ms. Renkas is a true educator with a gift for igniting and maintaining a child’s intellectual curiosity. My son does not surrender his afternoons easily, but he jumped at the chance to do Science Club with Ms. Renkas!” - Kimbi Marenakos (Finn’s mother)*

*“I am so happy that I signed up for this science club! I look forward to it every Wednesday! We get to be very interactive and learn how the experiments work after we do them. I hope I get to come again next semester!” - Hannah Finley*

*“I think that Science Club is absolutely amazing. From personal experience, it really shows you science in an entertaining way.” - Iris Steele*

*“This science club is one like no other! Here, students like me embrace science on a deeper level than in any science class, and to make it even more fun, we do experiments to go along with each subject that we learn! If you are looking for an interesting after-school activity, this is the best one to choose!” - Meredith Finley*

*"After-school science is a true highlight of Leah's week!" – Robyn Bagg*
